The four-part HC Topics Series: CON Law will provide an in-depth examination of Certificate of Need (CON) programs and their impact on the healthcare industry. The first installment provided an overview of states’ CON programs and the history of their development, and Part II discussed the current state of CON regulations. Part III evaluates CON programs against the changing landscape of the healthcare industry, and Part IV will examine the impact of the Patient Protection and Affordable Care Act (ACA) on CON programs.

Last month’s installment of the HC Topics Series: CON Law discussed the current state of CON programs across the country and how, despite evidence that such regulations are ineffective at controlling healthcare costs, most states still restrict the supply of at least some healthcare facilities, technologies, and services. In addition to cost-control justifications, proponents of CON regulations argue that these restrictions help many facilities cross-subsidize care to indigent patients, as well as promote quality and access to care. However, changes to the healthcare industry with respect to provider reimbursement and healthcare delivery may have fundamentally altered markets, at least partially invalidating these justifications and potentially transforming CON regulations into competitive barriers to entry that do more harm than good. This month’s installment will explore the relationship between CON programs and the changing landscape of the healthcare industry.

When CON laws originated, the primary driver was the “cost-plus” form of reimbursement utilized by the federal government and private payors, by which providers were incentivized to unnecessarily expand in exchange for greater reimbursement, thereby increasing healthcare costs in the process. CON laws were intended to correct for this problem and stem the “medical arms race” that had ensued. However, the adoption of the Medicare inpatient prospective payment system (IPPS) in the 1980s eliminated the reimbursement incentive for providers to expand, and the market forces of managed care in the 1990s played a significant role in correcting for excess capacity. The National Health Planning and Resources Development Act of 1974, which had made federal Medicaid funds contingent on states’ implementation of CON programs, was repealed in 1986, eliminating an additional financial and regulatory justification for these restrictions. As provider reimbursement shifts away from volume-based, fee-for-service (FFS) mechanisms toward value-driven forms, some CON proponents believe these restrictions will be less necessary moving forward.

In addition to the argument that CON programs are no longer necessary to or effective at controlling costs, there is a growing consensus that these restrictions actually drive up the cost of healthcare instead. Incumbent providers are protected from the competition that new entrants would bring, and as a result, these providers are not incentivized to lower costs or deliver more efficient care, and the exclusion of new competitors from a market keeps the supply of healthcare facilities and services below a competitive level. Many proponents argue that CON restrictions in lucrative healthcare service markets allow incumbent providers to realize profits by which they can cross-subsidize indigent patients’ care, and some have observed that “this method of financing indigent care may be preferred by legislators who do not want to face the political consequences of raising taxes to pay for the service[.]” However, evidence suggests that the protection of this ability to cross-subsidize may be unnecessary, as new competition does not impede community hospitals in the fulfillment of their charitable missions. This is largely due to the fact that specialty hospitals, long known for their “cherry picking” of more favorably reimbursed procedures, are generally emerging in geographic areas where they are competing for new patients (attributable to population growth), rather than luring existing patients away from community hospitals.

Although CON proponents argue these restrictions enhance access and quality, the exclusion that results from CON regulations may also keep competitors who can provide higher quality services or more innovative technology from entering markets, which in turn negatively impacts consumers’ access to care and quality of care received. Additionally, the length of CON application and appeal processes can delay the adoption of advanced technology, which limits patient choice and can also negatively impact some providers’ ability to recruit specialist physicians. Though the effect of CON regulations on quality of care is highly debated, there is some evidence to suggest that these restrictions may have the potential to improve access to care for underserved populations. However, the Department of Justice (DOJ), one of the two federal

agencies responsible for protecting and promoting competition in the healthcare industry, contends that these objectives can also be achieved through means that do not restrict competition. In contrast, most physicians are opposed to CON programs, particularly in the context of for-profit facilities, and medical societies commonly support the repeal of CON regulations. In addition to increasing the cost of healthcare services, many providers agree that the expenses related to the CON application process significantly increase the costs of capital projects.

In 2004, the Federal Trade Commission and the Department of Justice (the Agencies) issued a joint report recommending states examine their CON programs and "reconsider whether these programs best serve their citizens’ health care needs." Since that time, the Agencies have continued to advocate that states consider reforming or eliminating these barriers to entry, and recent litigation as to the constitutionality of these restrictions suggests the era of CON regulation may be nearing an end. Next month’s installment of the CON Law Series will consider the impact of the Patient Protection and Affordable Care Act (ACA) on CON programs.

Mr. Cimasi holds a Masters in Health Administration from the University of Maryland, as well as several professional designations: Accredited Senior Appraiser (ASA – American Society of Appraisers); Fellow Royal Intuition of Chartered Surveyors (FRICS – Royal Institute of Chartered Surveyors); Master Certified Business Appraiser (MCBA – Institute of Business Appraisers); Accredited Valuation Analyst (AVA – National Association of Certified Valuators and Analysts); and, Certified Merger & Acquisition Advisor (CM&AA – Alliance of Merger & Acquisition Advisors). He has served as an expert witness on cases in numerous courts, and has provided testimony before federal and state legislative committees. He is a nationally known speaker on healthcare industry topics, the author of several books, the latest of which include: “Accountable Care Organizations: Value Metrics and Capital Formation” [2015 - Taylor & Francis, a division of CRC Press], “The Adviser’s Guide to Healthcare” – Vols. I, II & III [2010 – AICPA], and “The U.S. Healthcare Certificate of Need Sourcebook” [2005 - Beard Books]. His most recent book, entitled “Healthcare Valuation: The Financial Appraisal of Enterprises, Assets, and Services” will be published by John Wiley & Sons in the Fall of 2013.

Mr. Cimasi is the author of numerous additional chapters in anthologies; books, and legal treatises; published articles in peer reviewed and industry trade journals; research papers and case studies; and, is often quoted by healthcare industry press. In 2006, Mr. Cimasi was honored with the prestigious “Shannon Pratt Award in Business Valuation” conferred by the Institute of Business Appraisers. Mr. Cimasi serves on the Editorial Board of the Business Appraisals Practice of the Institute of Business Appraisers, of which he is a member of the College of Fellows. In 2011, he was named a Fellow of the Royal Institution of Chartered Surveyors (RICS).

Todd A. Zigrang, MBA, MHA, ASA, FACHE, is the President of HEALTH CAPITAL CONSULTANTS (HCC), where he focuses on the areas valuation and financial analysis for hospitals and other healthcare enterprises. Mr. Zigrang has significant physician integration and financial analysis experience, and has participated in the development of a physician-owned multi-specialty MSO and networks involving a wide range of specialties; physician-owned hospitals, as well as several limited liability companies for the purpose of acquiring acute care and specialty hospitals, ASCs and other ancillary facilities; participated in the evaluation and negotiation of managed care contracts, performed and assisted in the valuation of various healthcare entities and related litigation support engagements; created pro-forma financials; written business plans; conducted a range of industry research; completed due diligence practice analysis; overseen the selection process for vendors, contractors, and architects; and, worked on the arrangement of financing.

Mr. Zigrang holds a Master of Science in Health Administration and a Masters in Business Administration from the University of Missouri at Columbia. He is a Fellow of the American College of Healthcare Executives, and serves as President of the St. Louis Chapter of the American Society of Appraisers (ASA). He has co-authored “Research and Financial Benchmarking in the Healthcare Industry” (STP Financial Management) and “Healthcare Industry Research and its Application in Financial Consulting” (Aspen Publishers). He has additionally taught before the Institute of Business Appraisers and CPA Leadership Institute, and has presented healthcare industry valuation related research papers before the Healthcare Financial Management Association; the National CPA Health Care Adviser’s Association; Association for Corporate Growth; Infocast Executive Education Series; the St. Louis Business Valuation Roundtable; and, Physician Hospitals of America.

Anne P. Sharamitaro, Esq., is the Executive Vice President & General Counsel of HEALTH CAPITAL CONSULTANTS (HCC), where she focuses on the areas of Certificate of Need (CON); regulatory compliance, managed care, and antitrust consulting. Ms. Sharamitaro is a member of the Missouri Bar and holds a J.D. and Health Law Certificate from Saint Louis University School of Law, where she served as an editor for the Journal of Health Law, published by the American Health Lawyers Association. Ms. Sharamitaro has presented healthcare industry related research papers before Physician Hospitals of America and the National Association of Certified Valuation Analysts and co-authored chapters in “Healthcare Organizations: Financial Management Strategies,” published in 2008.
